1、druid

springboot下,pom文件

```xml
<dependency>
        <groupId>com.alibaba</groupId>
        <artifactId>druid-spring-boot-starter</artifactId>
        <version>1.2.4</version>
</dependency>
```

yml

```yml
spring:
  application:
    name: boot
  main:
    allow-bean-definition-overriding: true
  datasource:
    type: com.alibaba.druid.pool.DruidDataSource
    url: jdbc:mysql://ip:3306/db?serverTimezone=Asia/Shanghai&useUnicode=true&characterEncoding=
    driver-class-name: com.mysql.cj.jdbc.Driver
    username: root
    password: XOnIiT/L9aIj1BoFgcGgIxqUmnC2AZlkc/WfCBVPdDLGVVbW81STArqBUTeDaGBQKF4YdfMXCTLjwuDIoz
    druid:
      filter:
        config:
          enabled: true
      connection-properties: config.decrypt=true;config.decrypt.key=MFwwDQYJKoZIhvcNAQEBBQADSwAw
```

密钥生成命令，跳转到druid的jar包下面，打开cmd

java -cp druid-1.2.4.jar com.alibaba.druid.filter.config.ConfigTools Win2021@ >miyao.txt
